

EPP Fire Safety and Rescue Products Company provide and guarantee superior solutions to support the Disaster and Risk Reduction Management program of our national and local government units. Our safety and rescue products preserve life and instill confidence when faced with natural perils that bring business interruption and risk.

With EPP Fire Safety and Rescue Products Company, the community is safe, secure and protected.

EPP Fire Safety and Rescue Products Company was established by Efren P. Palmiery. From his humble beginnings as a salesman in 1993, he was promoted to branch manager and later became a consistent top distributor of Palmer Asia Inc. until 2008.

In January 2009, Efren P. Palmiery established EPP Fire Safety Products to serve both the private and government sectors by supplying firemen's protective gears and firefighting equipment. With the advent of the disaster and risk reduction management program of both national and local government units, Mr Palmiery pursued to expand the company's product lines, to include water rescue, emergency medical, vehicle crash rescue equipment, collapsed structure, and high angle rescue tools and equipment. Then, he upgraded to partnership and registered a new business name at Security Exchange Commission; EPP Fire Safety and Rescue Products Co.
